

Nanny's House

Choosing the Right Preschool

Make it personal. It's important to find a program that is a good fit for your child. Carefully consider your child's personality and learning style when investigating the options. Remember: You know your child best. Research the various types of programs available, and make the selection that best fits your child's needs.

1

MAKE IT PERSONAL

You know your child best.

2

REMEMBER THE BIG PICTURE

Learning through discovery.

3

WHAT ARE YOU LOOKING FOR

Evaluate your family needs for care.

Remember the big picture. There are a number of early childhood philosophies, but they tend to fall into two broad categories in the United States. The first philosophy is learning through discovery, which includes programs with a focus on child-directed activities. Teachers serve as guides and plan activities based on children's developmental levels. The second philosophy centers on programs that are more academically based, and typically include drill and practice components.

Consider family based program or commercial center. Keep in mind teacher to student ratios. When deciding what childcare/preschool program is the best option for your little one, consider individual needs, such as age, energy level, health and maturity. Considering logistics involved to make your parenting journey less chaotic. Defining what is important to you when it comes to your child's developmental environment. I hope these tips help you make the best decision for your childcare needs.

Nanny's House Philosophy

The approach emphasizes nature, music, creativity, and hands-on learning with guidance.

The early childhood philosophy at Nanny's House is inspired by Montessori, Waldorf, Reggio Emilia, HighScope, Bank Street. Each philosophy aids the development of the Nanny's House approach to nurturing the whole child through the growth mindset. Although early learning philosophies differ each practice fosters learning keeping the thirst for knowledge at the forefront. Each child is unique and does not necessarily fit into one particular category. Captivating a young group's attention requires a knowledge baseline encompassing a new age evolving early learning approach.

Art & Music

Nanny's House is organically designed to offer opportunities for modeled behavior from different ages and stages. Siblings are able to interact with one another during parts of their day. Older children are encouraged to be gentle,

nurturing and patient. For example during the potty training teachers take a backseat and allow other potty trained student to help support their peers through the developmental milestone modeling the behavior naturally. Nanny's House is a home away from home only fostering a full time program. Teachers support individual needs and tailor the perfect approach to learning for each child. The child is an active learner and gains knowledge about the world through

experience. Students set the learning pace, and the teacher serves as a guide. Comparable to play-based learning, the Nanny's House approach teaches lessons through hands-on activities, such as building blocks, puzzles, clay, and dramatic play. Open-ended and child-led, students learn through art, projects, and

activities that reflect their ideas and interests. Musical influence is a staple in harnessing the love for learning in the classroom community.

We believe that parents need compassionate teachers supporting them through changes, challenges and victories throughout the journey of life. Nanny's House is a co-parenting team, helping raise your child in a loving manner to be kind, courteous, helpful, honest and respectful.

Nurture a child's spirit, soul, and body and to focus on the child's interests.

Whole child and family approach too early learning

THE FOCUS OF NANNY'S HOUSE PRESCHOOLS IS ON A CHILD'S MENTAL, SOCIAL, EMOTIONAL, AND PHYSICAL GROWTH. CHILDREN LEARN ACTIVELY BY HAVING HANDS-ON EXPERIENCES WITH THEIR SURROUNDINGS, AND LEARNING IS SUPPORTED. IT IS BASED ON PAST AND CURRENT CHILD DEVELOPMENT RESEARCH.
